Opening the project in Android Studio

Now, you have already installed all software's that required configuring Android project. To openAndroid project follow this steps:

1. Open Android Studio > File > New > Import Project

2. In the dialog that opens, browse to the project (or a directory containing source files) that you want to import.
3. Then go to 'Build' Menu > Clean Project
4. Wait for few minutes until all errors are gone. Ignore any warning appears in 'Problems' tab.

Change App Config

Go to [AppConfig.kt](#) And change this with your's

- Package name
- App name
- Version name

Change AdMob Config

Go to [AdsConfig.kt](#)

And Change Unit's IDs and AdMob App Id and Privacy url

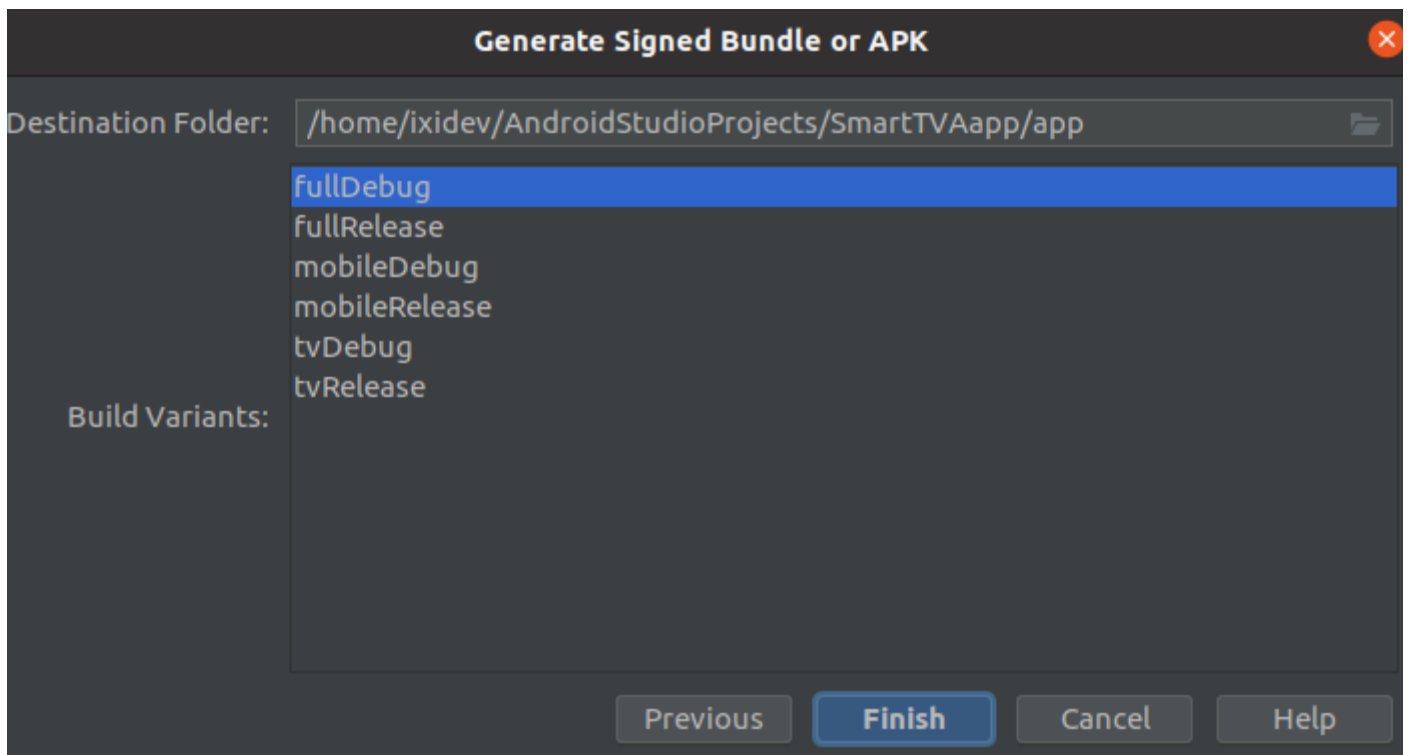

```
const val HOME_BANNER_AD_ID = "ca-app-pub-3940256099942544/6300978111"
